**early pregnancy symptoms?!?!?!?!?**

## **confused and Hungry Asked: early pregnancy symptoms?!?!?!?!?**

for the past 2.5 Weeks i have been having headaches, aversions to food, backaches that hurt a lot when i stand for a while, nausea, heartburn, and (yes, this is gross)white stuff in my panties, and just recently I have been having to pee A LOT (like every hour), i have puked twice and been having mood swings. I had sex 3 times in July NO protection was used at all and he came inside me. my bf doesn't think I am pregnant and when I called a pregnancy hot line and the lady I was talking to said I need to go and get a test at the doctors IMMEDIATELY. Well, I am going to go sometime in 1-2 weeks but i want to know how likely it is that I am pregnant. My boyfriend avoids all topics about pregnancy, is that normal? Are the things listed above symptoms of early pregnancy? I have taken 2 pregnancy test and 1 came out positive but the 2nd came out positive. Please help!!!!
